DETAILED ACTION

Examiner's Amendment

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with applicant's attorney, Mr. C. James Wheeler on 05/19/2000.

2. The application has been amended as follows:

In claim 1, line 4, the following has been inserted after "a first fitting":

--and a second fitting;

a1

inserting a distal end of a probe through the puncture, said probe having a foot, said fitting being releasably mounted near a first end and a second end of the foot;

articulating the elongate foot of the probe within the blood vessel so that the foot moves from a low profile configuration aligned along a shaft of the probe to a deployed configuration extending laterally from the shaft and along the blood vessel, such that the fittings are positioned at opposed sides of the puncture;--

Lines 5 and 6 of claim 1 have been deleted.

Art Unit: 3731

Lines 2, 3, and 4 of claim 2 have been deleted.

In claim 3, lines 2-4, "wherein the filament.....fitting" has been deleted.

In claim 5, lines 1 and 2, "wherein the first.....puncture, and" has been deleted.

Claims 6, 7, 12-14, 26, 27, 42 and 43 have been canceled.

In claim 8, line 1, "7" has been changed to --1--.

In claim 8, line 1, "deployed" has been deleted.

In claim 8, line 2, "deploying" has been changed to --articulating--.

In claim 9, line 2, "displacing" has been changed to --articulating--.

In claim 10, line 1, "7" has been changed to --1--.

In claim 11, line 1, "7" has been changed to --1--.

In claim 19, in between lines 6 and 7 the following have been inserted:

--supporting a suture by said first and second ends of the foot;--

In claim 19, line 11, after "advancing" the following has been inserted: --said--.

In claim 24, in between lines 6 and 7, the following has been inserted:

--supporting a suture by two ends of said foot wherein said two ends extend laterally with the opening positioned therebetween;--

In claim 24, line 11, --said-- has been inserted after "advancing".

In claim 28, in between lines 2 and 3, the following has been inserted:

--a shaft suitable for insertion along the tissue tract and into the vessel through a

puncture; and

93

a foot displaceably mounted on said shaft actuatable to extend laterally from said shaft;

and--

In claim 28, line 7, after "a fitting" the following has been inserted --releasably mounted on the foot and--

In claim 32, lines 1 and 2, the following has been deleted: "the fitting is mounted on a foot near a distal end of a probe,".

AG

In claim 32, line 2, "having" has been changed to --has--.

Allowable Subject Matter

3. Claims 1-5, 8-11, 15-25, 28-41, 44-47 are allowed over prior art of record.

Reasons for Allowance

4. The following is an examiner's statement of reasons for allowance:

Claims 1-5, 8-11, 15-25, 28-41, 44-47 have been allowed because prior art of record fails to disclose or suggest the method and apparatus for suturing a puncture through a vessel wall of a blood vessel, whereas the method comprises attaching a flexible filament to two fittings; inserting a probe through the puncture, said probe having a foot, and said fitting being releasably mounted on two ends of said foot; articulating the foot of the probe so that the foot extends laterally from the shaft and said fittings are positioned at opposed sides of the puncture; forming needle paths by advancing two needles through the vessel wall outside the puncture; coupling the needles with the

L

fittings, and withdrawing the needles so that portions of the filament withdraw through the vessel wall along the needle paths.

In short, the claimed articulating suturing device and method are novel. Although prior art of record discloses various methods and apparatus of suturing of body lumens, the claimed invention is novel since there is no obvious motivation to combine these various features disclosed by the prior art of record in this manner. Thus, the invention is distinguishable from the prior art of record, and the claims are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submission should be clearly labeled "Comments on Statement of Reasons for Allowance."

Drawings

5. The application having been allowed, formal drawings are required in response to this Office action.
